DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 21, it is unclear how applicant can remove a portion of the elongate tube **proximal to the handle** to shorten the length of the tube generally to the desired length. The drawing and specification does not appear to support applicant's amendment. Clearly, the handle is at the proximal end of the tube.

Claim Rejections - 35 USC § 103

Claims 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson et al U.S. Pat. No. 6,872,198.

Wilson discloses providing an elongate tube having a working channel (54) and a handle assembly (72) having an engagement apparatus (see threads) adapted to fit over the tube, the handle having a movable relationship with the tube when the engagement apparatus is in a first state and a fixed relationship with the tube when the engagement apparatus is in a second state (figs. 1 and 2); placing the engagement apparatus in the first state; moving the handle to a predetermined location along the tube (figs. 1 and 2); and placing the engagement apparatus in the second state to fix the

handle to the tube at the predetermined location and provide the access device with the desired length (figs. 1 and 2). However, Wilson does not disclose removing a portion of the elongate tube to shorten the length of the tube generally to the desired length.

It would have been a matter of design choice to vary the length of the tube, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955). As to claims 22, (70).

Allowable Subject Matter

Claims 10, 12-14, 23, 28, 29 and 31 are allowable over the prior art of record.

Response to Arguments

Applicant's arguments filed 1/13/06 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., while the handle is engaged with the tube) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). The elongated tube can be clearly seen in the assembly of (66, 62, 58 and 54).

Applicant's arguments are directed to another portion of the device, which has nothing to do with the examiner's rejection. Therefore, the rejection has been maintained.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
